WORK EXPERIENCE

London Computer Systems **May 2023 - Present**
Software Developer *Mason, OH*

- Develop and maintain Net Dial Tone (NDT), a hosted VoIP phone platform that integrates with Rent Manager, built with Asterisk, OpenSIPS, Node.js/TypeScript, C# .NET, Angular, MySQL, and Kubernetes.
- Created and own the interactive call flow visualizer customers and support staff use to trace misrouted calls.
- Built server-side call delivery for NDT's Android and iOS apps, ringing all of a user's devices, stopping ringing on the other devices when one answers, keeping call state in sync, and handling weak connections.
- Designed and developed a configurable state machine for building complex Asterisk ARI call flows and dialplans.
- Added backend API endpoints and business logic, real-time WebSocket messaging, and integration and unit tests.

Jarvizar **Oct. 2023 - Present**
Owner and Developer *Cincinnati, OH*

- Design and publish 3D printable miniature maps with 31K+ followers and 180K+ downloads, mostly on MakerWorld. Featured creator on Thingiverse, with three models featured on MakerWorld.
- Built City Model, a TypeScript, React, and Three.js web app that turns any area of the map into a multicolor 3D printable model, with terrain, buildings, roads, and water from Overture Maps.
- Added LiDAR from 50+ public surveys, decoded in Web Workers to measure buildings or build whole models.
- Developed accounts and paid tiers on Cloudflare Workers and D1 with email and Google sign-in, backer redeem codes, and an admin dashboard, launching through a MakerWorld crowdfunding campaign in Nov. 2026.

University of Cincinnati Carl H. Lindner College of Business **Jan. 2022 - May 2023**
IT Help Desk Technician (Student Worker) *Cincinnati, OH*

- Assisted with software installation, network troubleshooting, and hardware, AV, and classroom equipment repairs.

Martin & Associates **Aug. 2019 - Dec. 2021**
Software Developer (Co-op) *Cincinnati, OH*

- Led development of ERP and CRM integration services using C# .NET, REST APIs, Quartz.NET, and ProvideX.
- Worked directly with clients on feature requests, integration issues, and support using BeyondTrust/Bomgar.

Phototype **May 2018 - Aug. 2019**
Application Development Intern *Cincinnati, OH*

- Designed reports, restructured sales data, refined the CRM platform, and assisted with QA testing.

PROJECTS

Citydriver 2 & Coastline | JavaScript, Three.js, WebXR, Electron **Aug. 2025 - Present**

- Citydriver 2: taxi game in a procedurally generated island city, with traffic, pedestrians, weather, and VR.
- Coastline: endless driving game across nine routes, with all terrain, models, and audio generated in code.

JarLang | Python **Mar. 2023 - Sept. 2026**

- Programming language with a parser, semantic analyzer, interpreter, x86-64 compiler, and browser playground.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, C#, Python, SQL, Angular, React, Node.js, .NET, Three.js, WebXR
Backend & Infrastructure: REST APIs, WebSockets, Asterisk ARI/AMI, OpenSIPS, Docker, Kubernetes, Rancher, CI/CD
Cloud & Testing: Cloudflare Workers, MySQL, D1/SQLite, Vitest, Playwright, WCAG accessibility, Git
3D & Mapping: Blender, QGIS, SolidWorks, Inkscape, OpenStreetMap, Overture Maps, LiDAR, 3D printing

EDUCATION

University of Cincinnati, College of Engineering & Applied Science **Graduated May 2023**
Bachelor of Science, Computer Science *Cincinnati, OH*

- Awarded Cincinnatus Scholarship, Dean's List; 3.5/4.0 GPA
